

THE NEW
HAVAL H2

HAVAL

THE NEW HAVAL H2. AS UNIQUE AS YOU ARE

Express yourself with the new Haval H2. Its stylish looks, luxurious interior, exceptional power, great safety and superb driveability will create an all-new you!

LUXURY COMES STANDARD

Step inside the new Haval H2 and be welcomed into a world of luxury with subtle mood lighting and soft touch material. There's also ample room to store everything you need for your journey.

The centre console adopts the popular piano-lacquer materials, atmosphere lighting and many other features, creating rare luxurious comfort.

DRIVEN TO IMPRESS

COMFORT & ENTERTAINMENT

Haval's ergonomic and humanistic approach to design makes the H2 one of the easiest SUVs to enjoy. The seats are at an average hip-height, which provides easy entry and exit, so there's no awkward climbing as is the case with other SUVs.

Behind the wheel, you'll notice the comfortable upright driving position giving you enhanced vision of the road ahead and the logical placement of switches and controls makes for easy driving.

The 3D, fashionable and multi-functional dashboard embodies a reassuring sense of technology. It shows essential driving information, including instantaneous fuel consumption, remaining driving mileage and the latest technical entertainment options. And with Apple CarPlay, you can access and enjoy your iPhone safely while driving.

HAVAL H2

POWER & ECONOMY

The new Haval H2 incorporates advanced technology and equipment levels to ensure your journey is stress-free. Equipped with a 4 cylinder 1.5L turbo charged engine, the H2 is powerful and economical. Designed with superior road comfort, the new H2 feels solid and secure due to its sophisticated SUV suspension. The technologically leading GW4G15B high-efficiency and energy-saving engine boasts outstanding sporting performance. The 105kW maximum power output and 202Nm peak torque output explodes with instantaneous power on demand.

SAFETY & SECURITY

The safety features on the new H2 gives you peace-of-mind. In the event of an accident, the airbags deploy to immediately relieve the applied impact forces to the driver/front passenger, and thus minimise harm. The Tyre Pressure Monitoring System (TPMS) monitors the tyre pressure in real time. This system is able to detect any tyre anomalies thus increasing safety. Keyless entry, featuring advanced radio frequency identification technology, allows the chipset within the key to automatically lock and unlock the doors at the touch of the door handle.
